Sweet iced Coffee with Coconut Milk

TOTAL TIME 10 minutes LEVEL 10 minutes BUDGET Under \$2

Sweet Iced Coffee with coconut milk is easy to make and stores well in the fridge. Make a large batch and save yourself a few trips to the coffee shop

INGREDIENTS

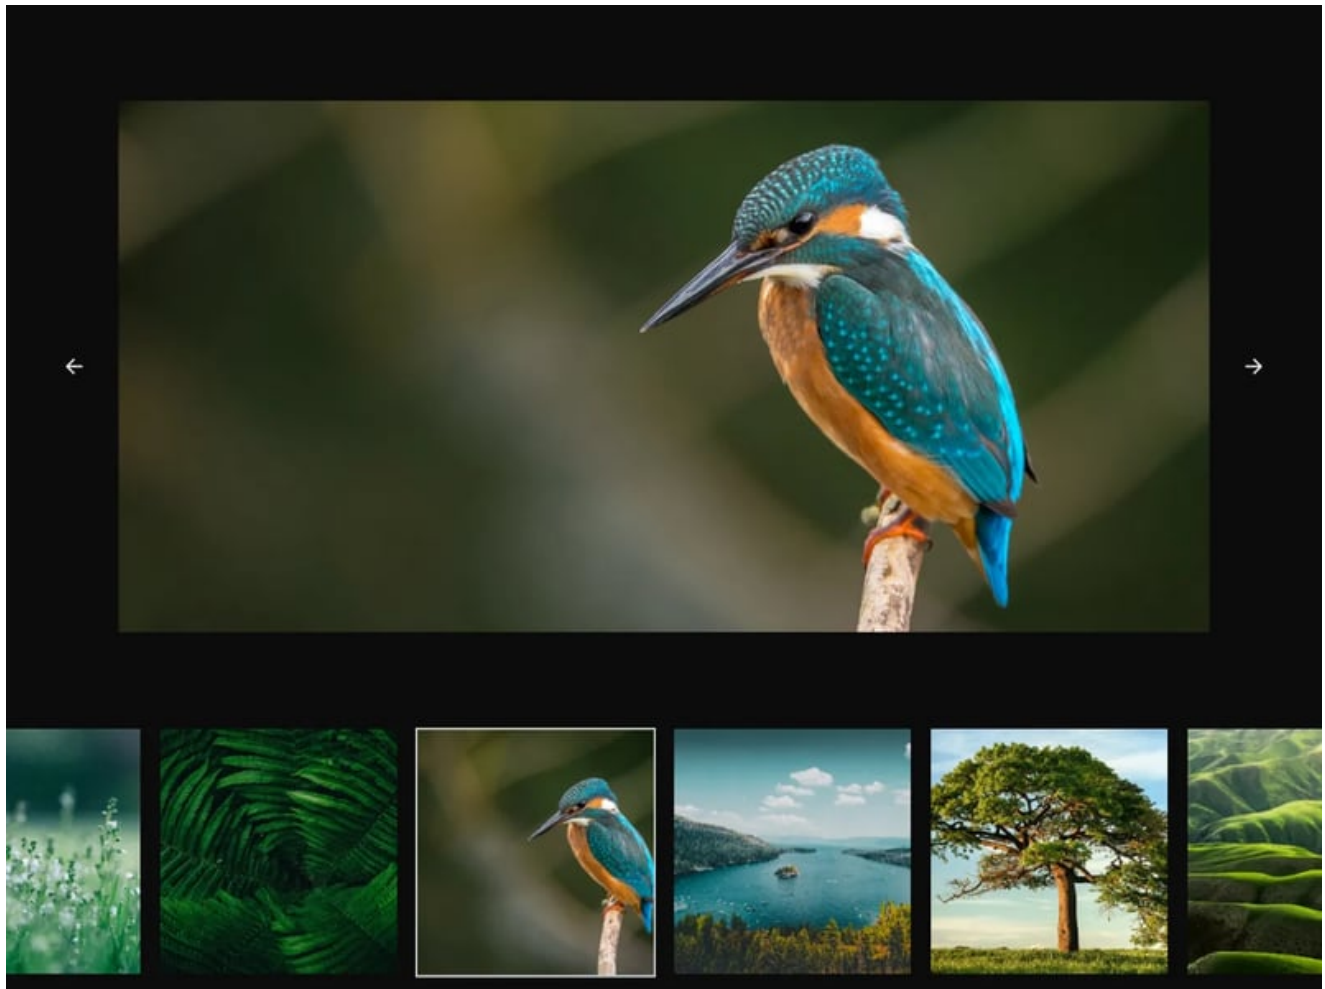

- ☒ 3 tablespoon Espresso coffee powder
- ☐ 1 cup off the boil water
- ☐ 1 cup Coconut milk
- ☐ 3 tablespoon Espresso coffee powder

INSTRUCTIONS

1. Boil some water and let sit for 1-2 minutes.
2. Put the coffee grounds into a cafetière and pour in the water.
3. Let the coffee steep for 5 minutes then slowly press down the plunger on your Cafetière.
4. Pour the coffee into a jug, allow to cool then chill for several hours.
5. Whisk in the coconut milk and condensed milk and serve over plenty of ice.
6. This coffee can be stored in the fridge for up to 5 days. Shake or stir again before serving.

Craft a delightful recipe display to enhance readability and user engagement.

6. Image Carousel

Develop an image carousel to understand handling user interactions and transitions.

Build a task management board that helps users organize projects and daily activities.

14. Shopping List

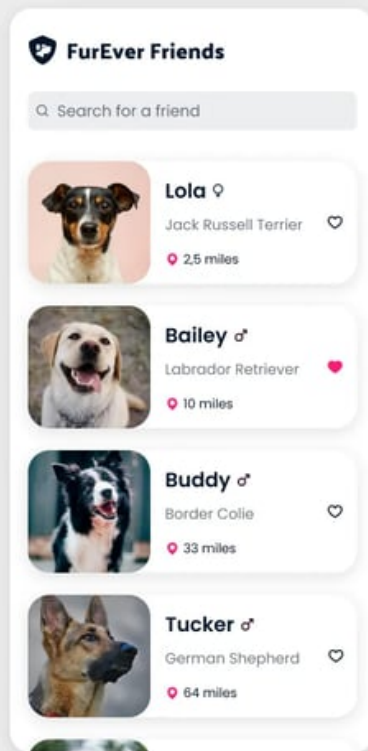

Create an interactive shopping list with order summary, and promo code sections.

15. Notifications

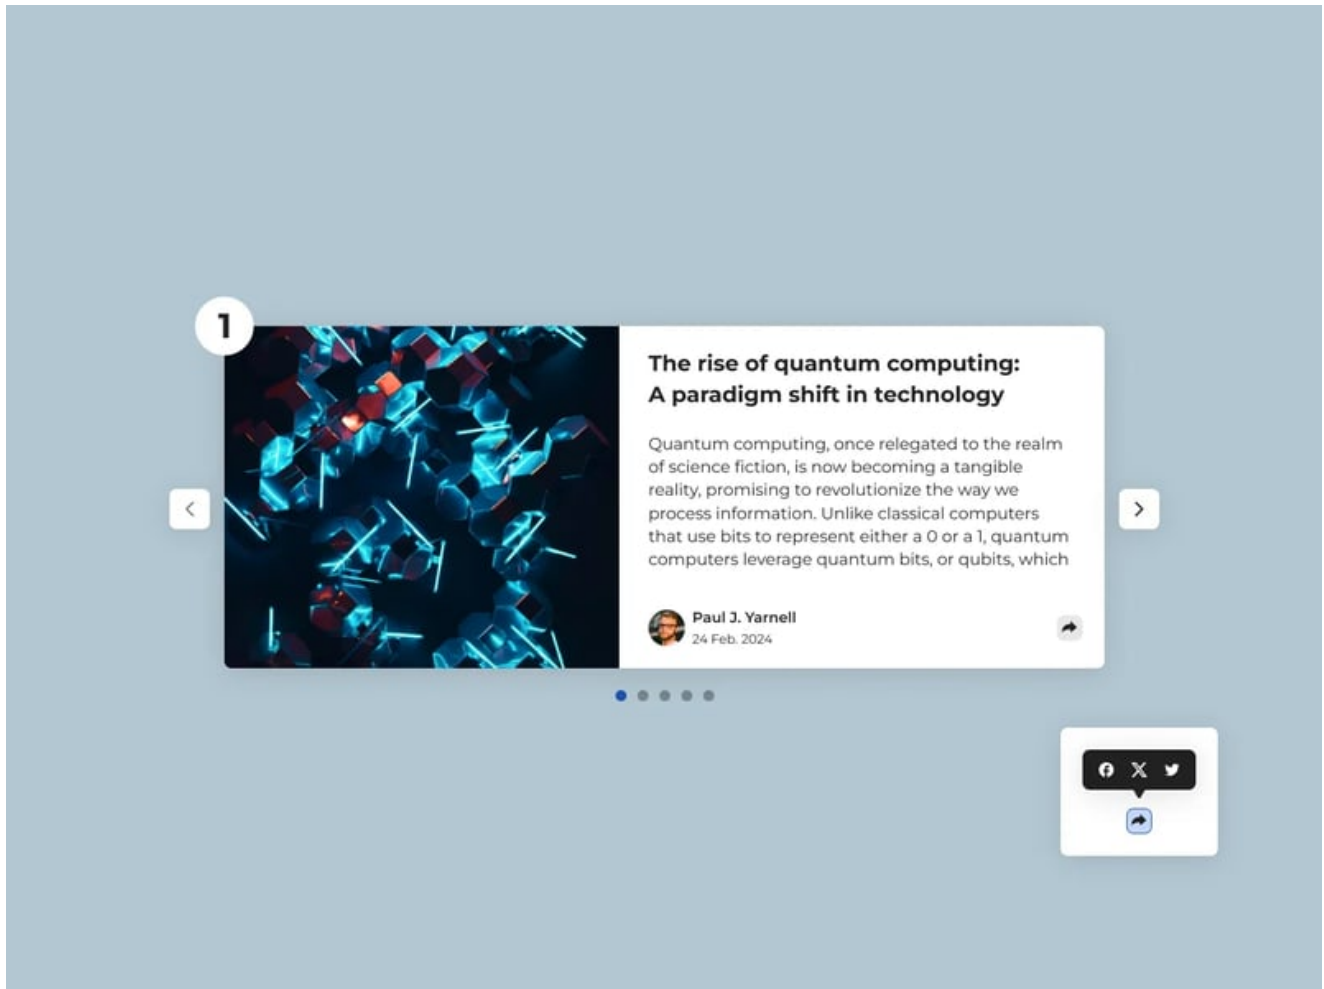

Implement a notification system with different types of notifications and an empty state without any of them.

16. Fur Friends

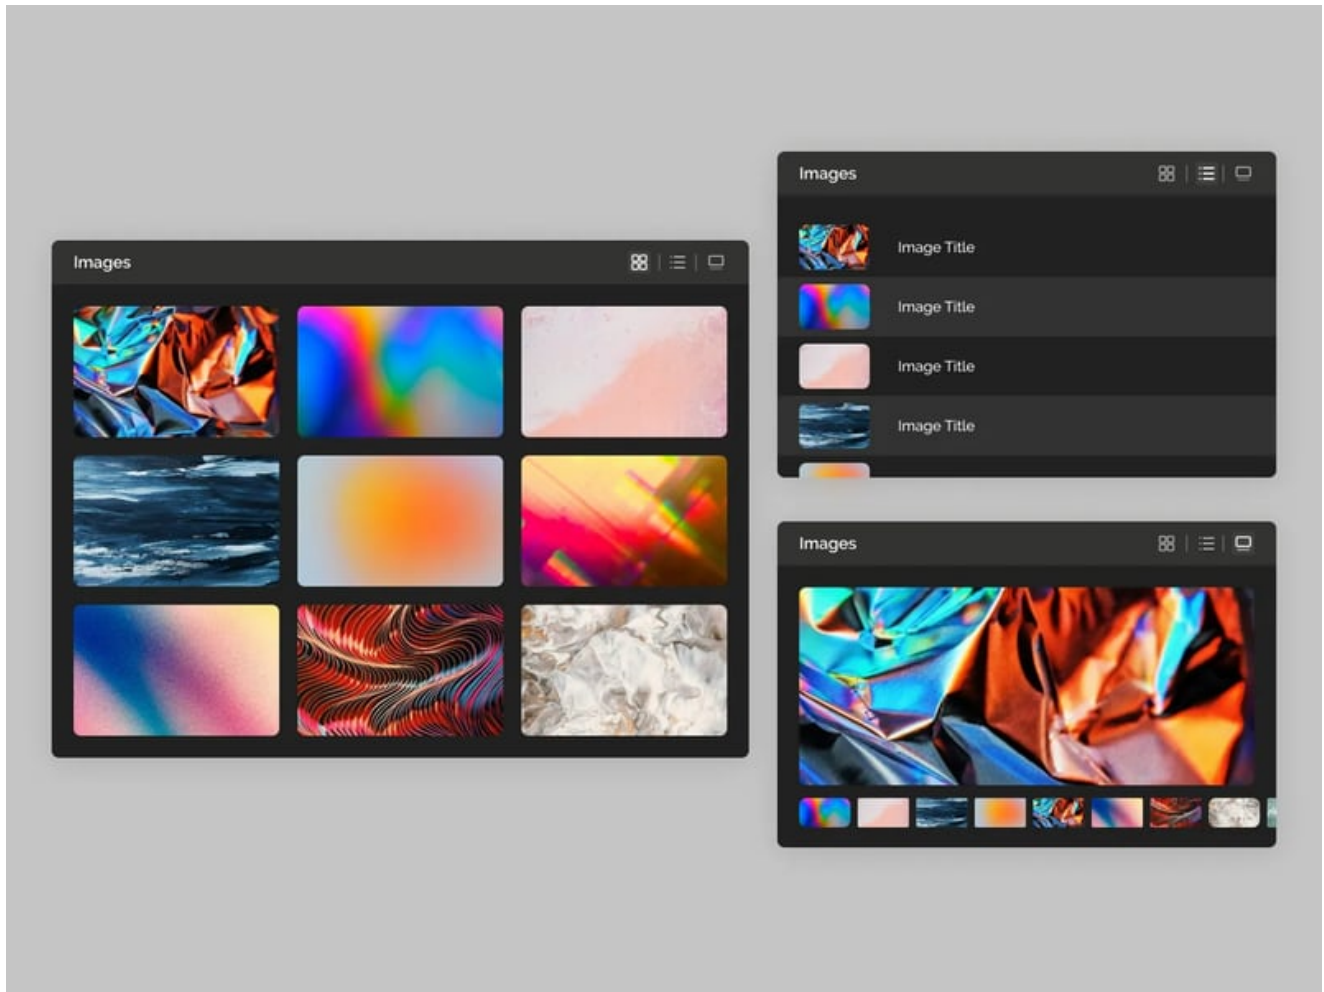

Craft an engaging list for pet lovers to explore pets with a pet details card.

17. Article Slider

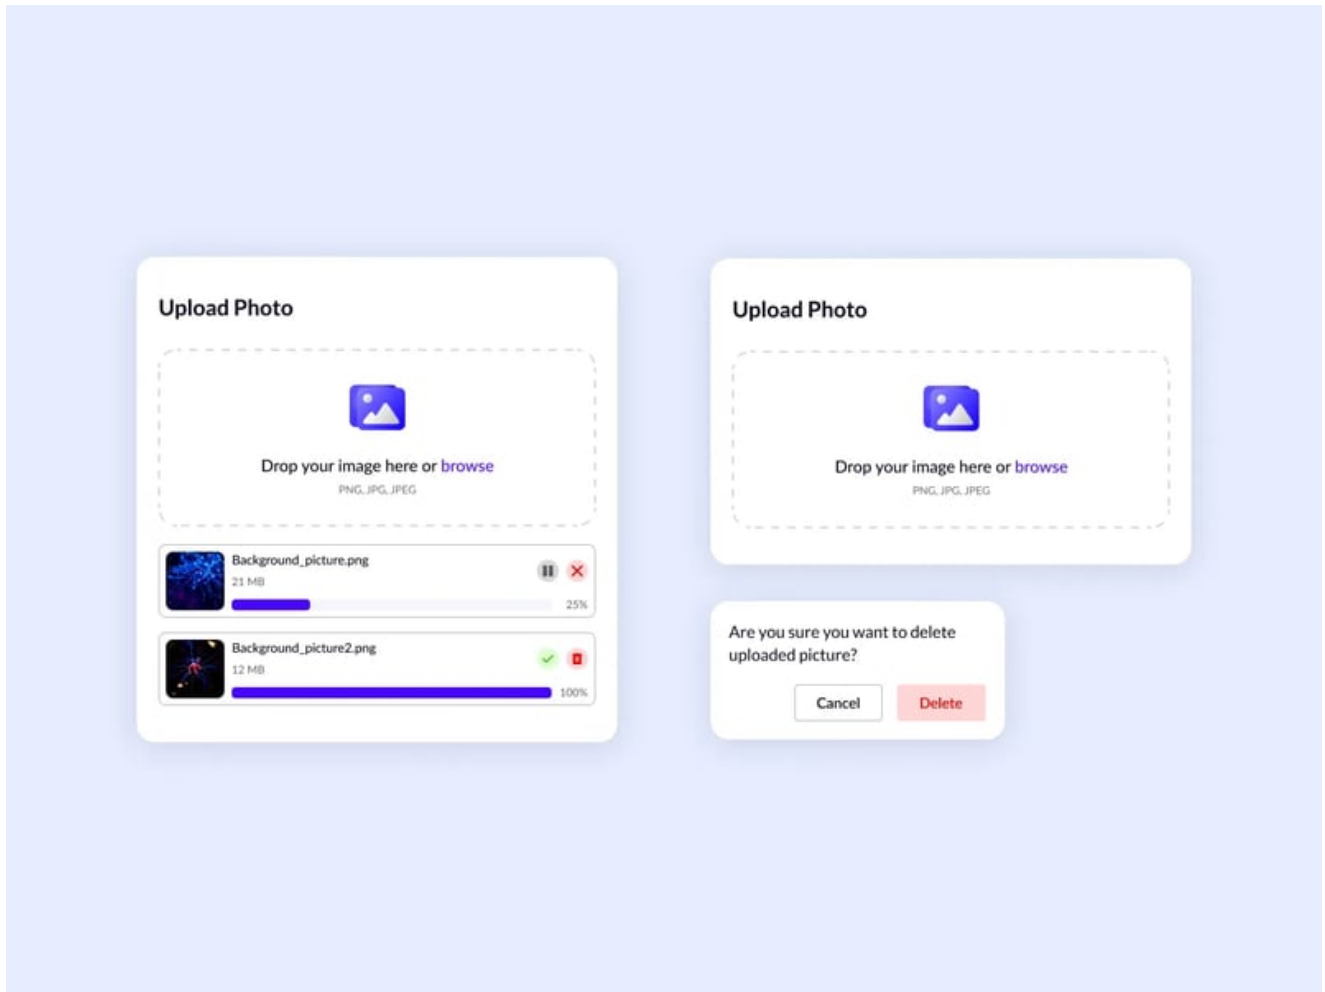

Implement an article slider that highlights featured stories with smooth navigation.

18. Images Preview

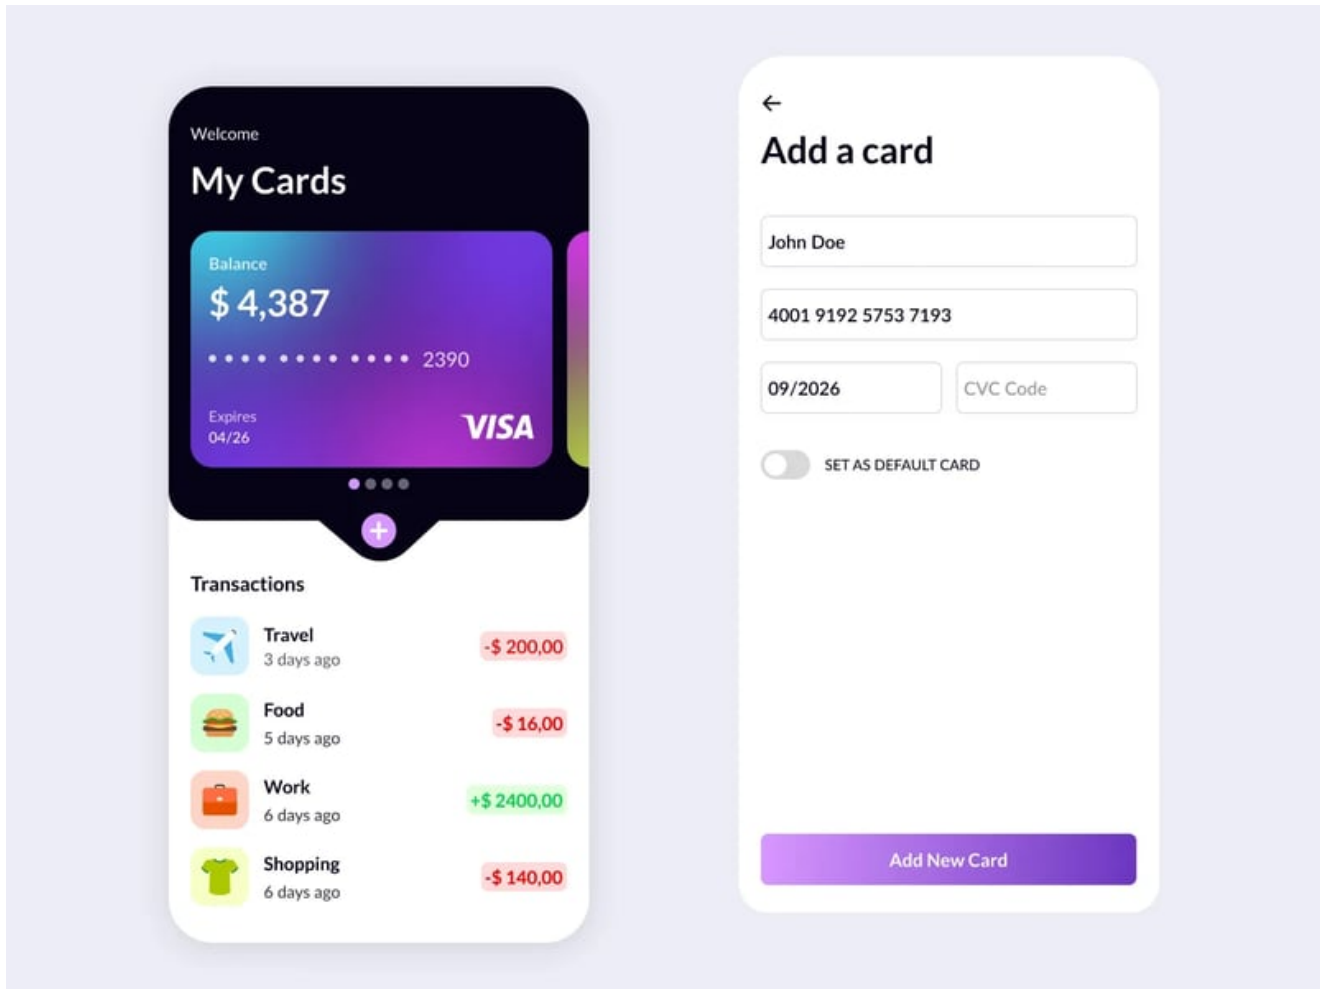

Craft a gallery app that allows users to preview images in different layouts.

19. Upload Images

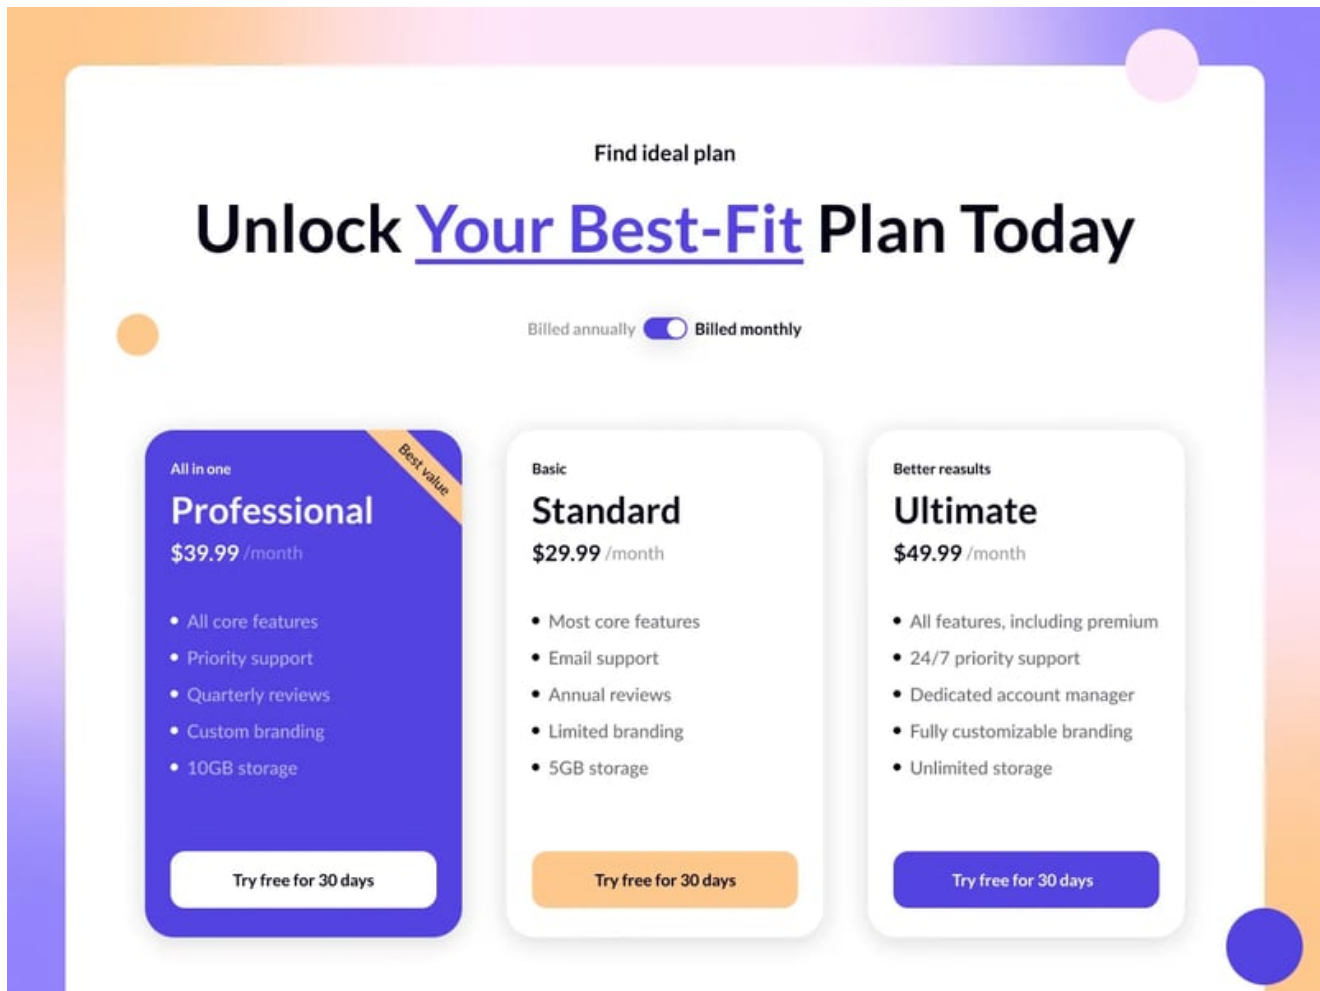

Create an image upload interface that supports drag-and-drop functionality and previews.

20. Card Wallet

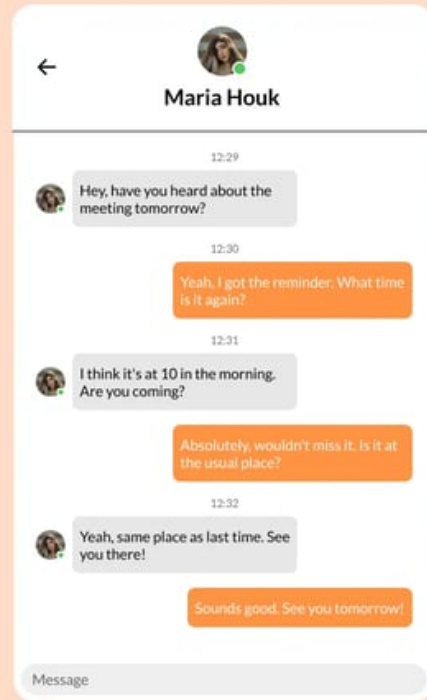

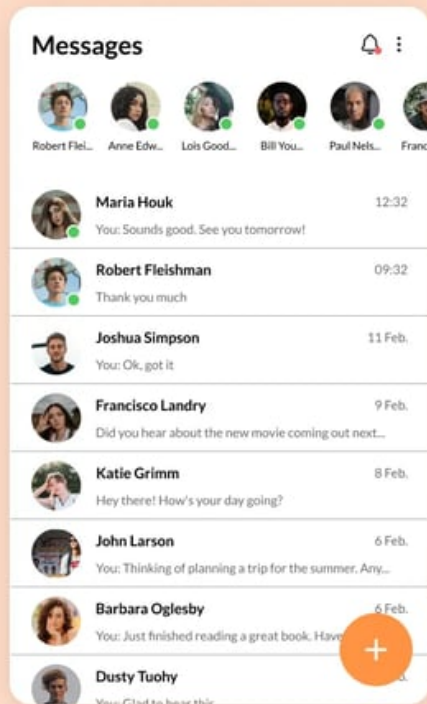

Develop a digital wallet interface that displays user cards, and card transactions and allows adding a new card.

21. Pricing Plans

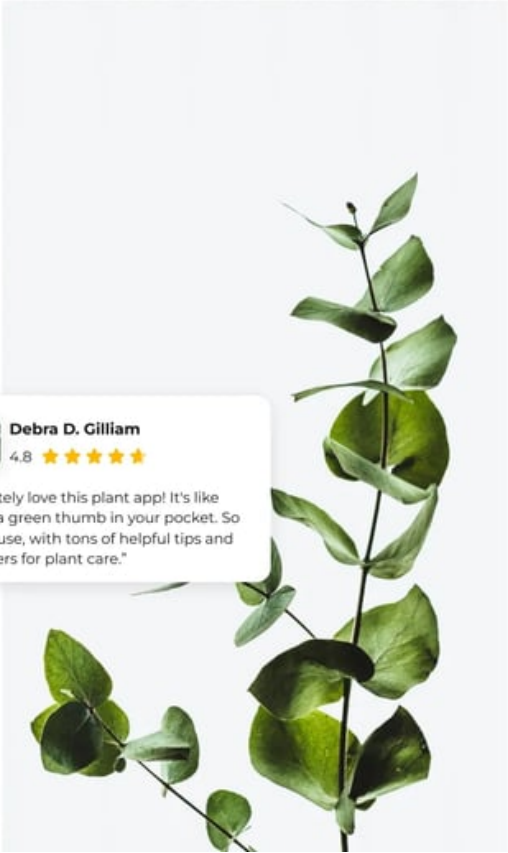

Design a clear and concise pricing plan interface that helps users choose the right option.

22. Messages

Build a messaging app interface that supports a conversations list and individual 1-1 message view.

23. Home Page

Make your home beautiful with plants

Unlock the secrets of greenery and infuse every corner with life and serenity. From vibrant blooms to lush foliage, let your home reflect the timeless elegance of nature's bounty.

Debra D. Gilliam
4.8 ★★★★★

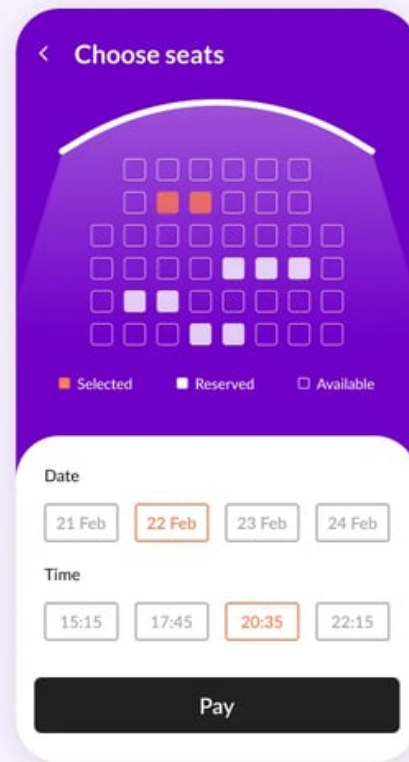

"Absolutely love this plant app! It's like having a green thumb in your pocket. So easy to use, with tons of helpful tips and reminders for plant care."

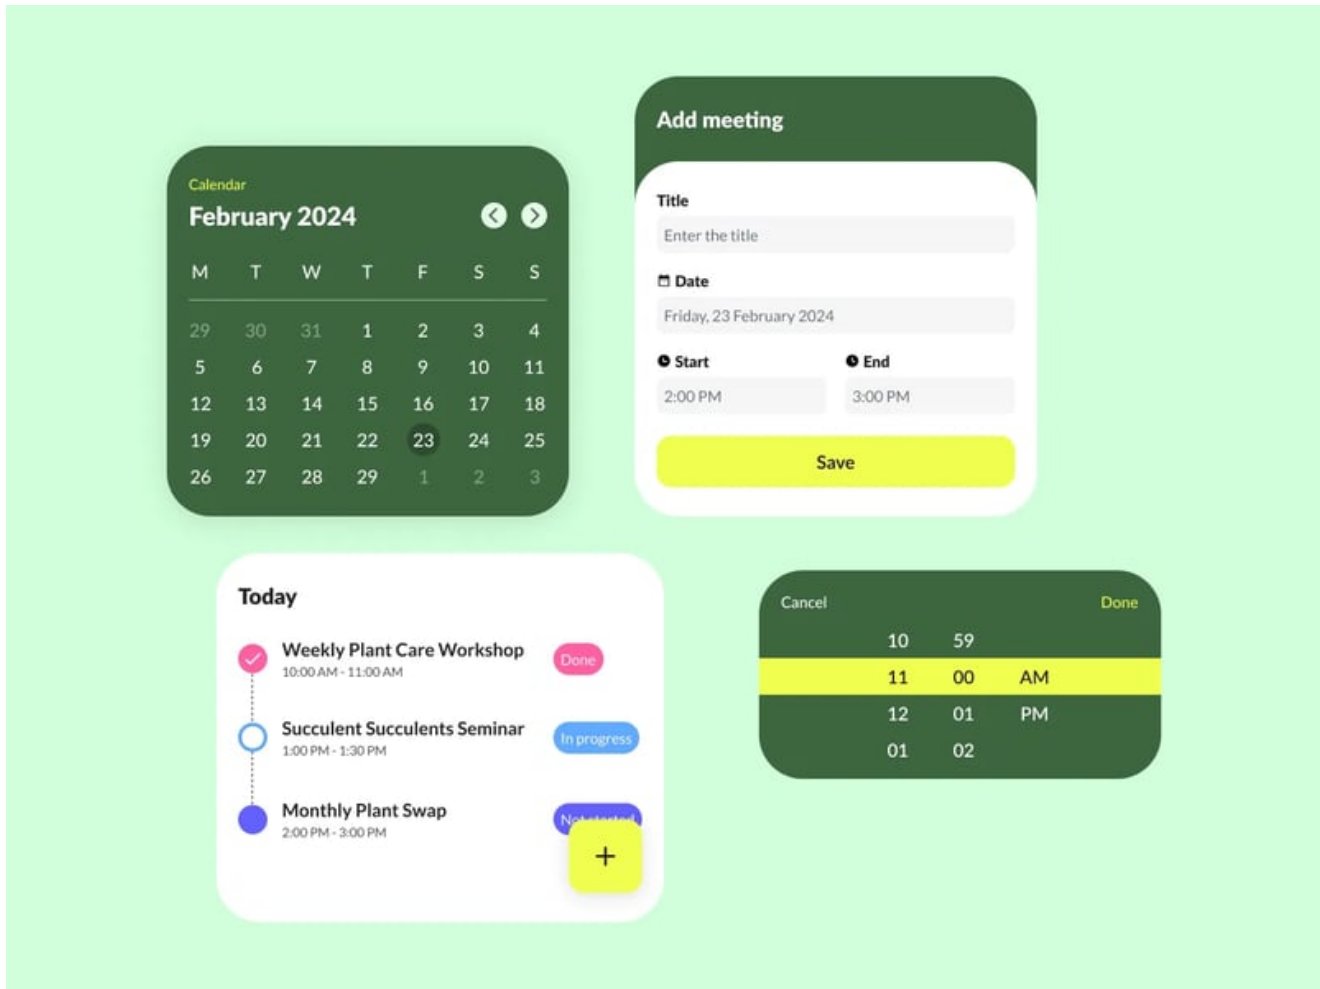

Create a captivating homepage that draws visitors in and guides them through beautiful plants.

24. Movie Ticket

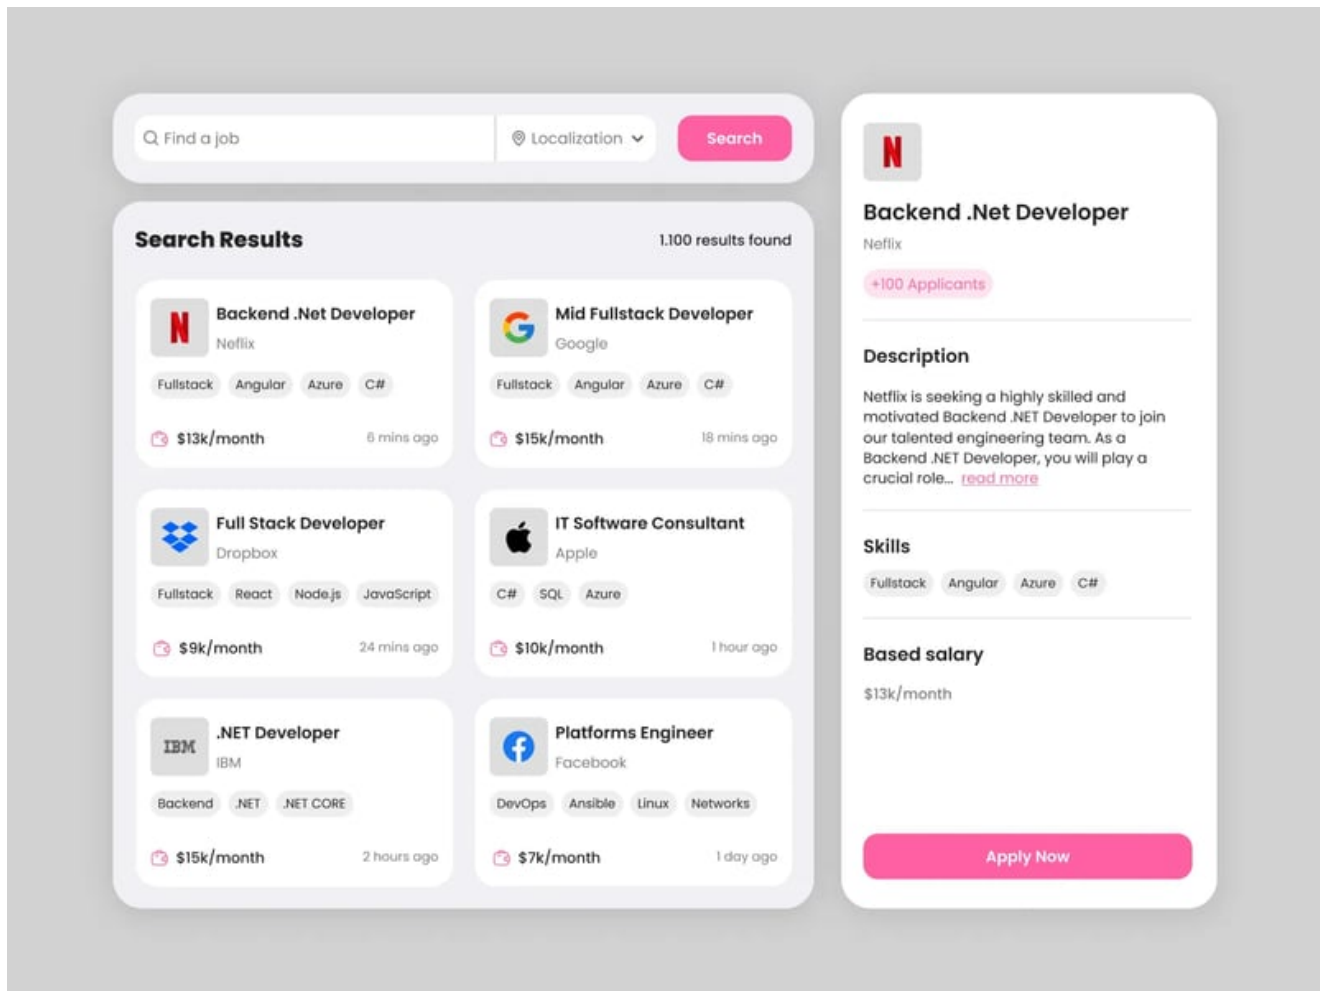

Develop a movie ticket interface that allows users to buy tickets and choose seats.

25. Meeting Schedule

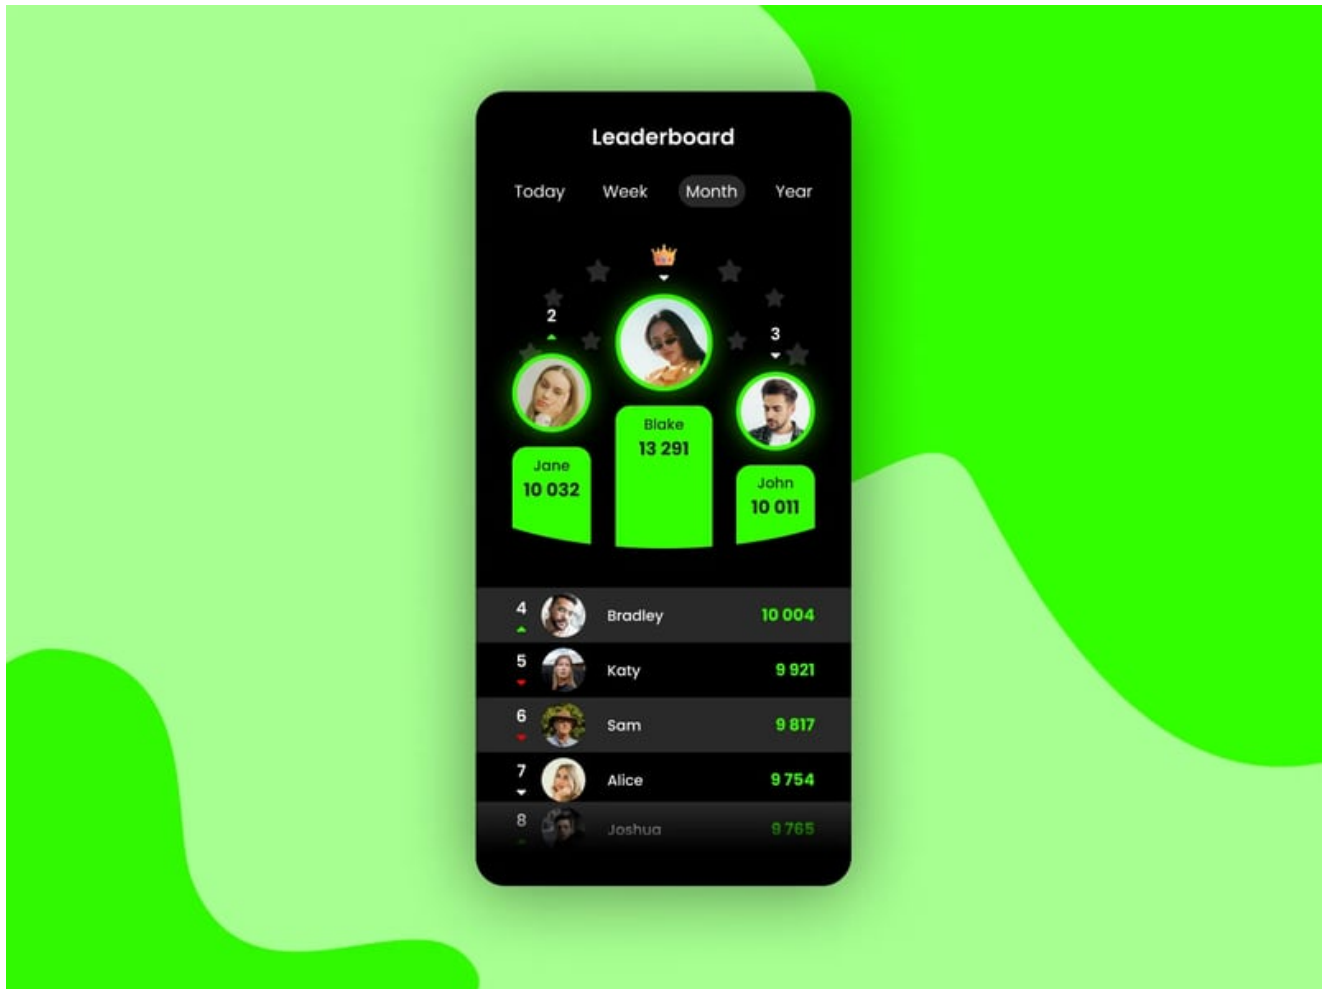

Create a scheduling app that helps users plan and coordinate meetings effectively.

26. Job Board

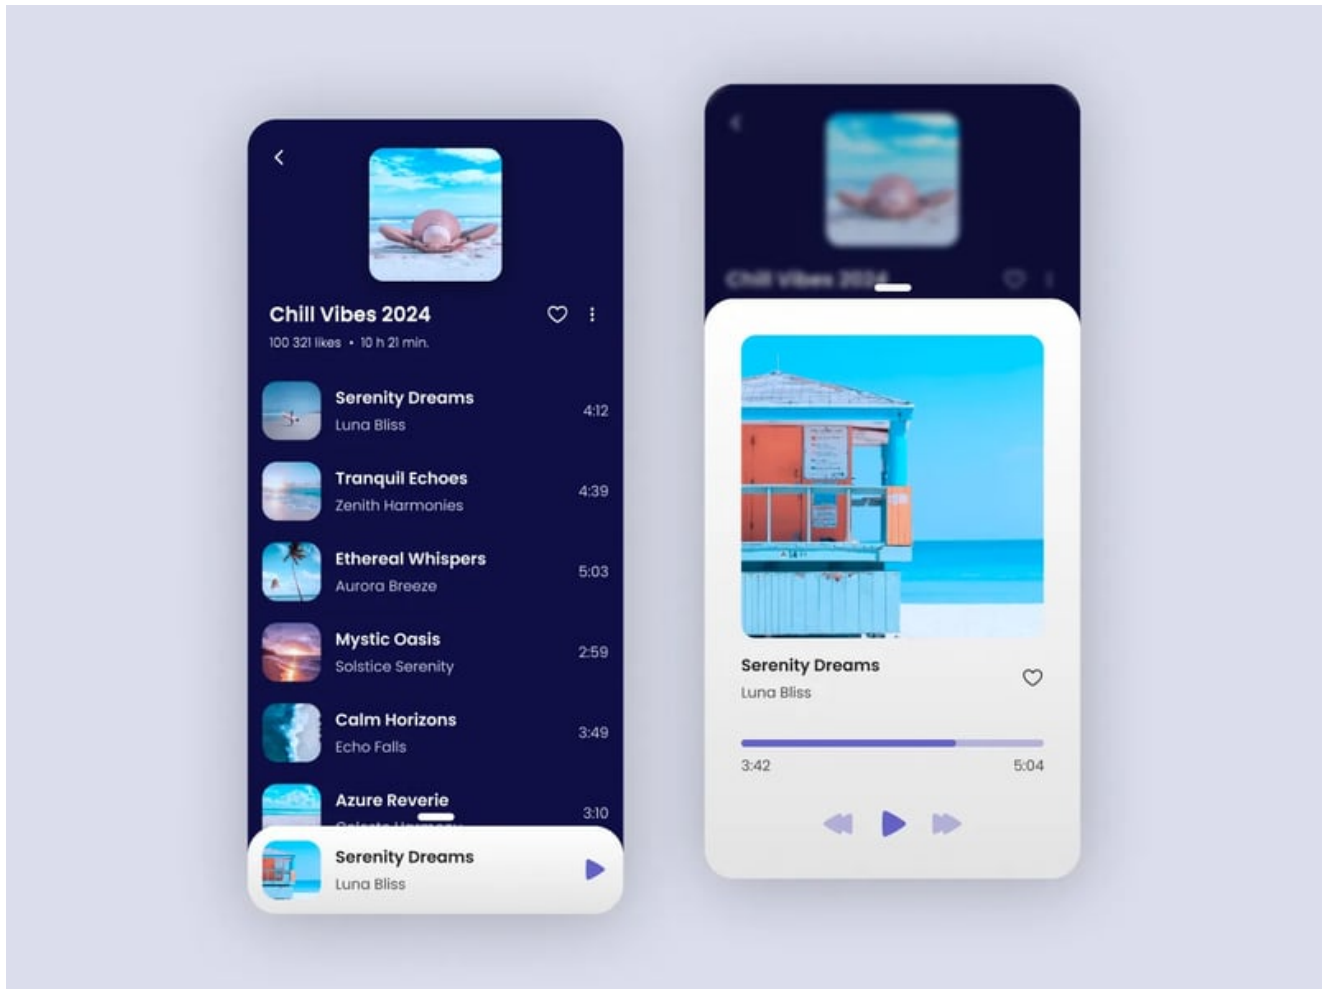

Create a job board that is intuitive for users looking for career opportunities.

27. Leaderboards

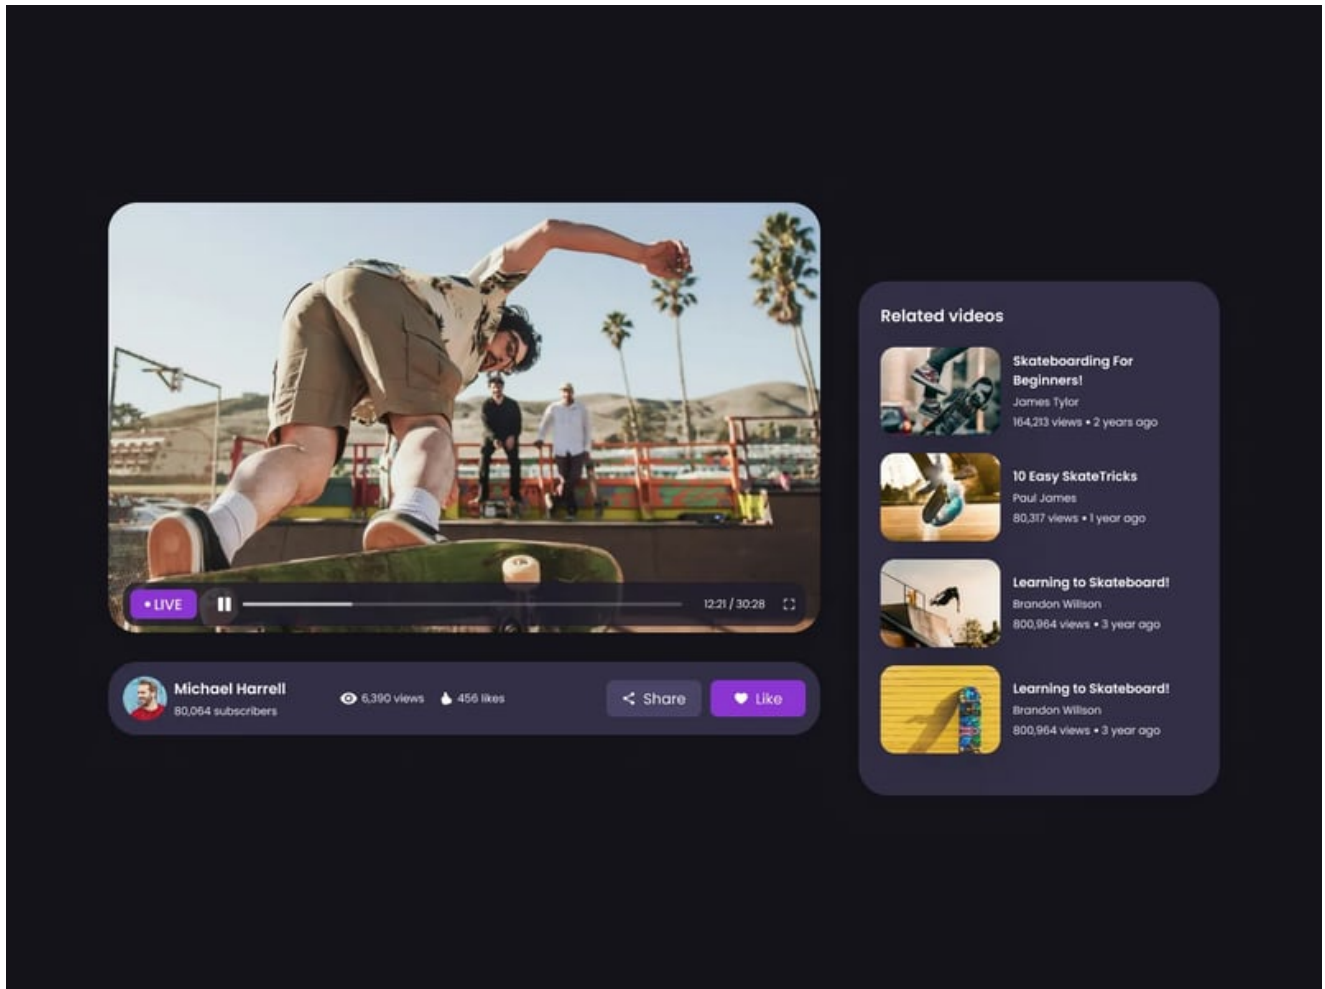

Build a leaderboard interface that dynamically displays user rankings and scores from today to year categories.

28. Playlist

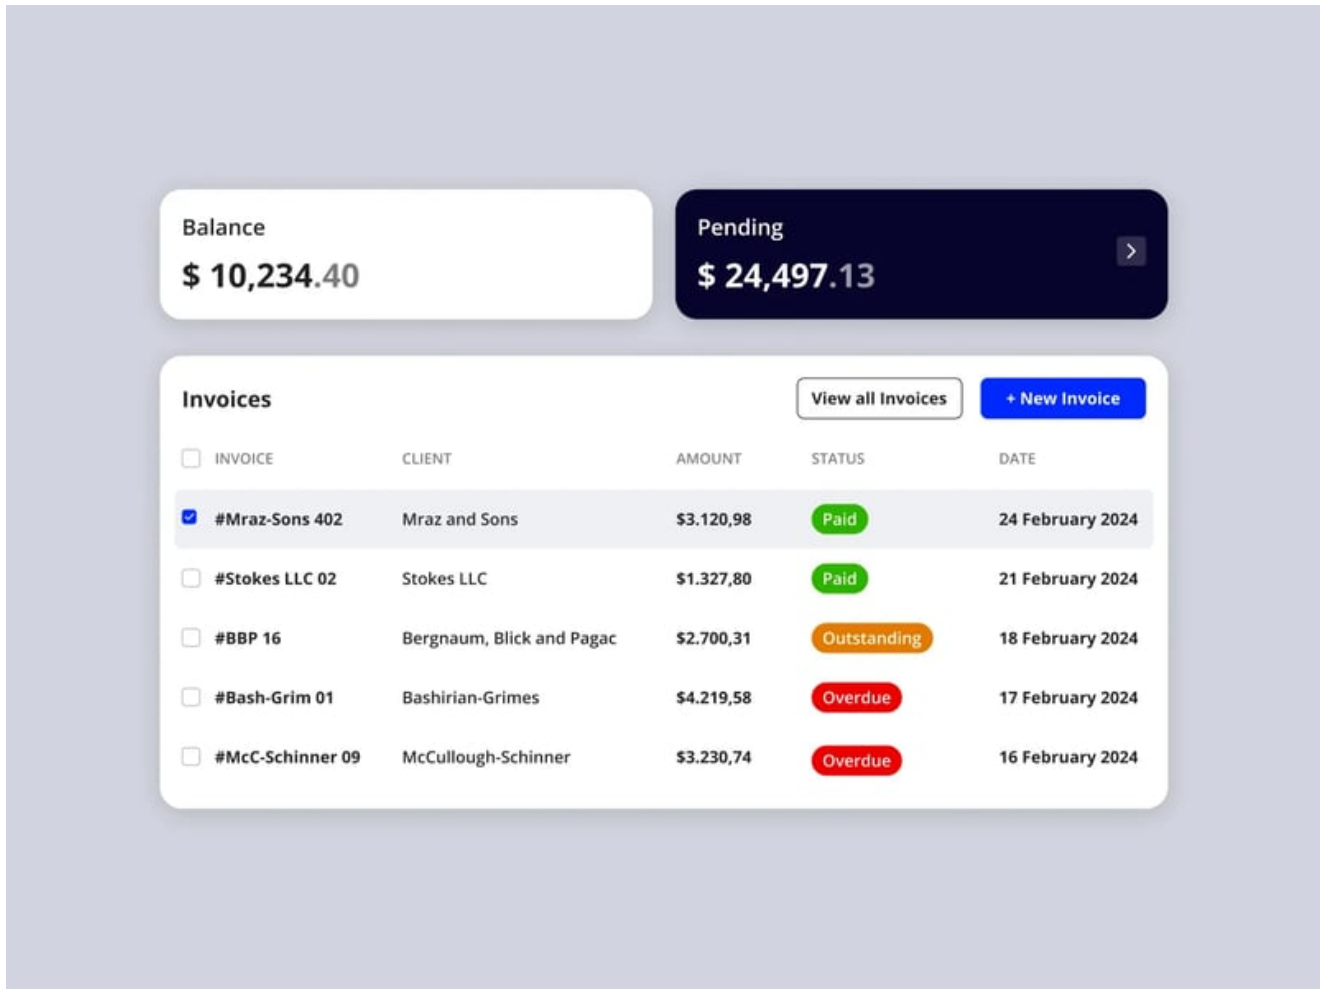

Implement a music playlist interface that allows opening a pop-up with the current song.

29. Video Player

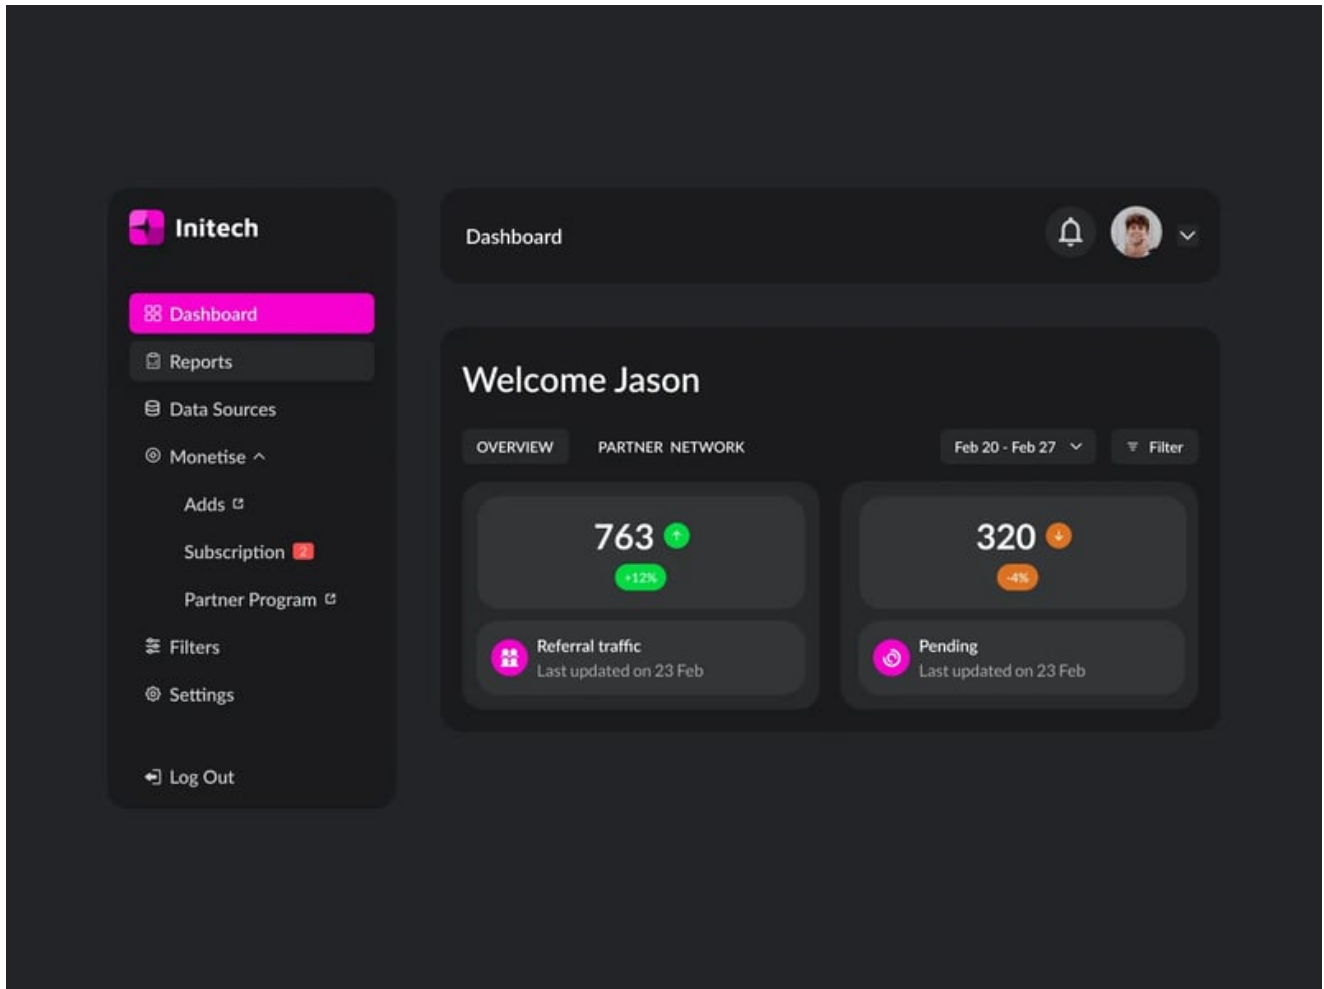

Create a custom video player that supports various media formats and user interactions.

30. Invoices

Implement an invoice interface that helps users manage billing and track payments efficiently.

31. Dashboard

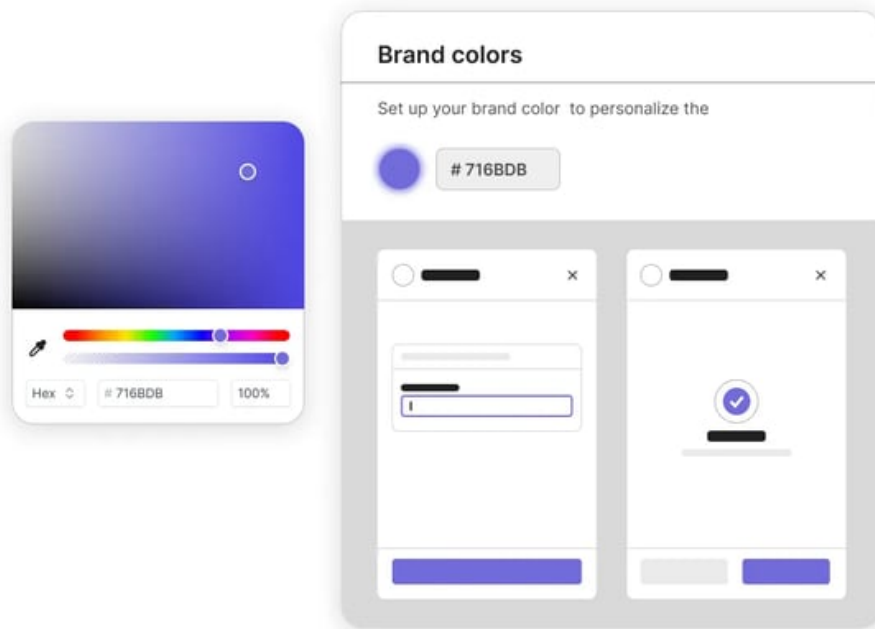

Build a comprehensive dashboard that provides users with insights and data visualizations.

32. Newsletter

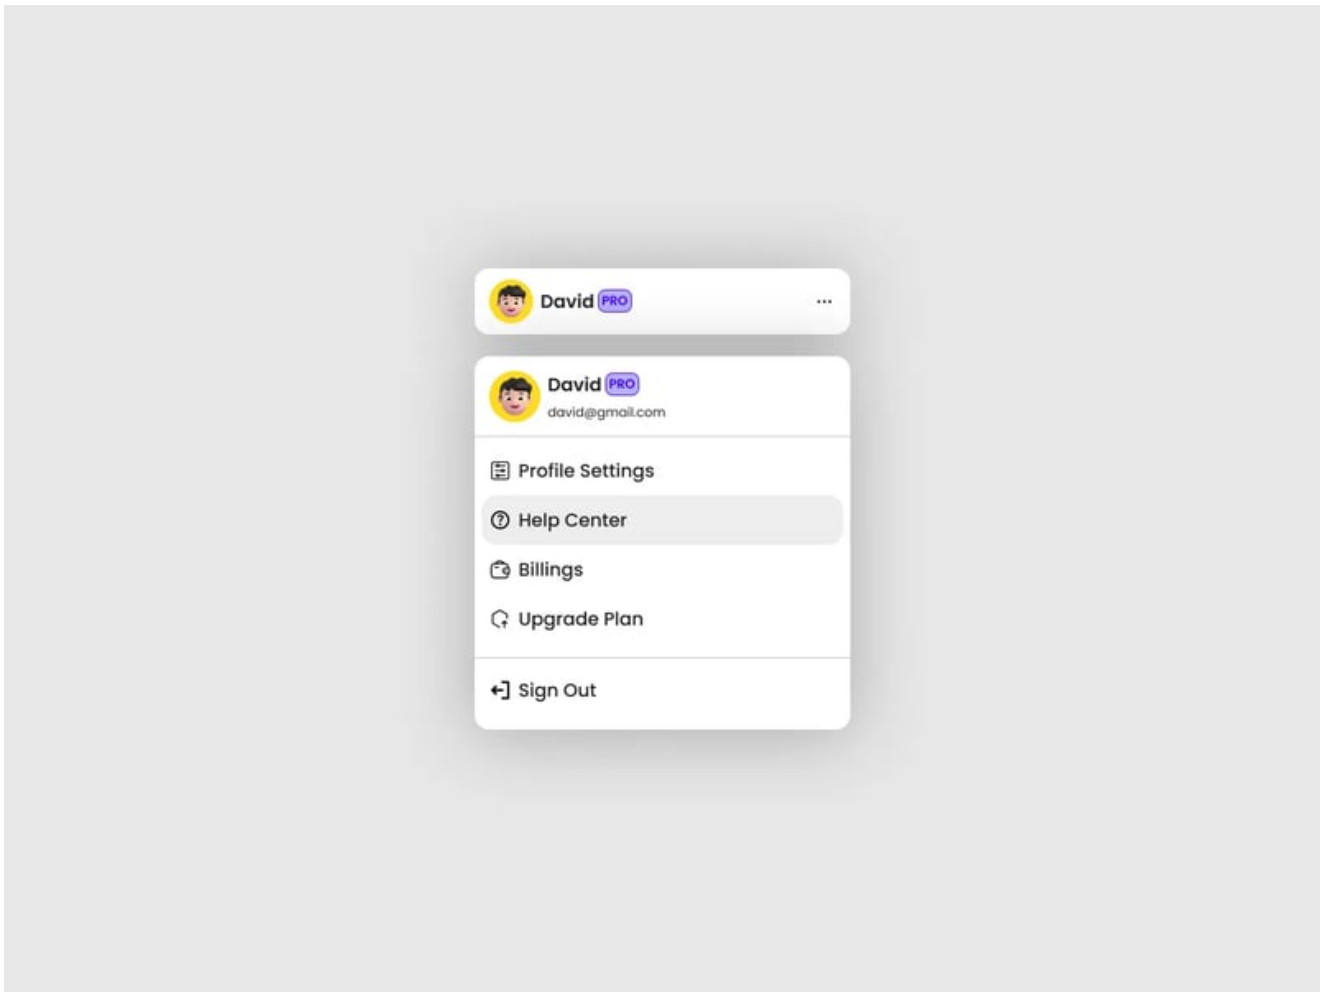

Create a newsletter sign-up page that captures user interest with an attractive design.

33. Brand Visualizer

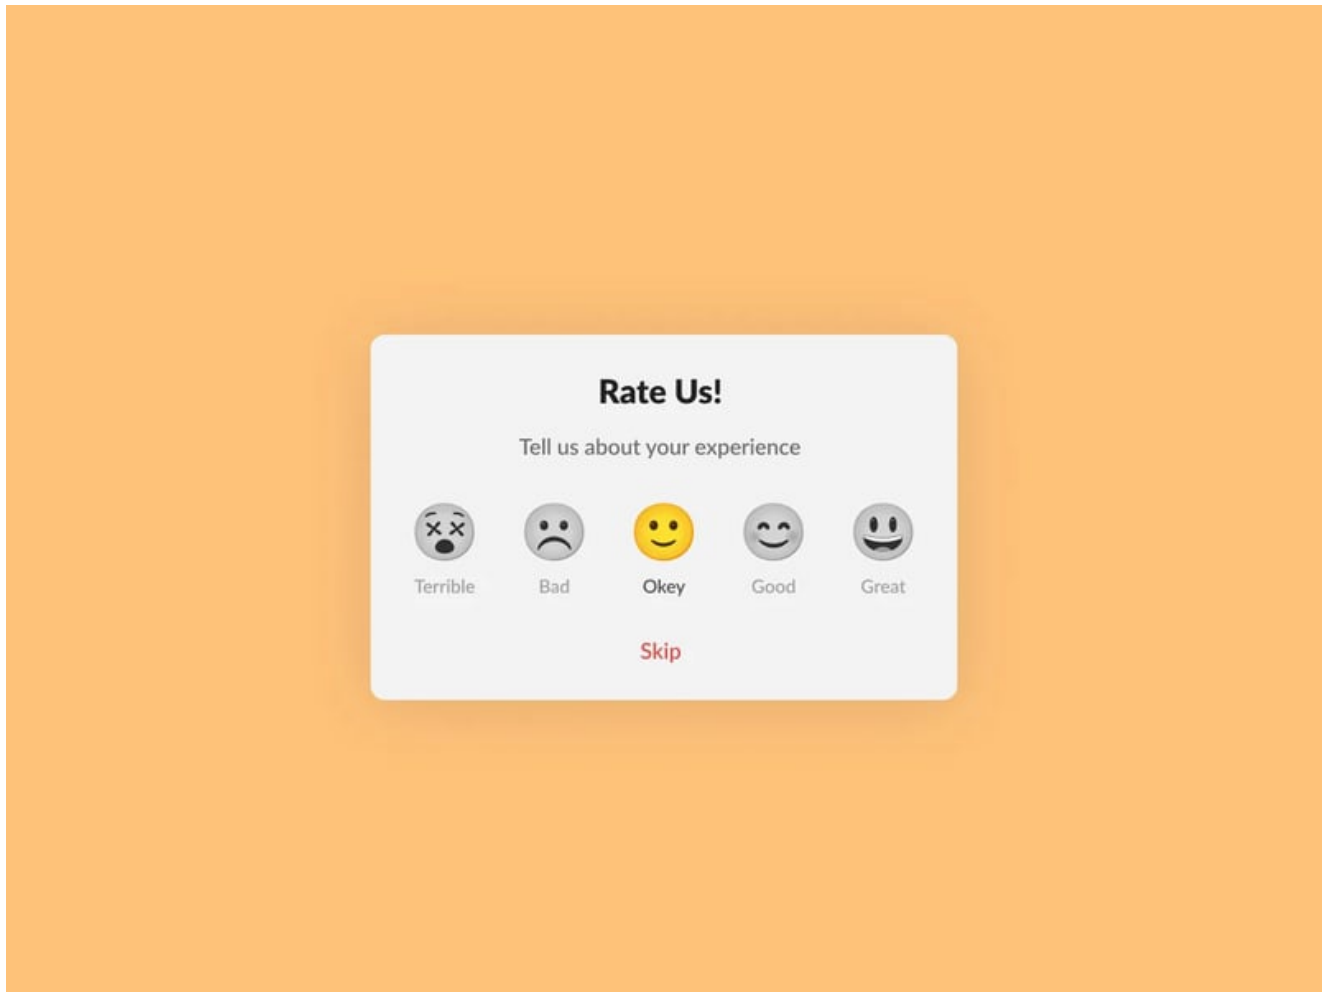

Develop a tool to create and preview brand elements like color schemes.

34. User Profile

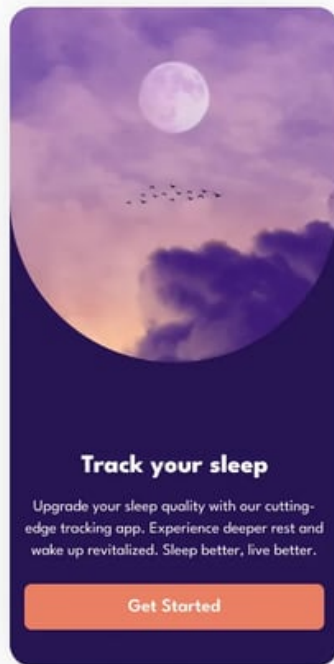

Design a user profile dropdown menu with various menu items.

35. Rate Us

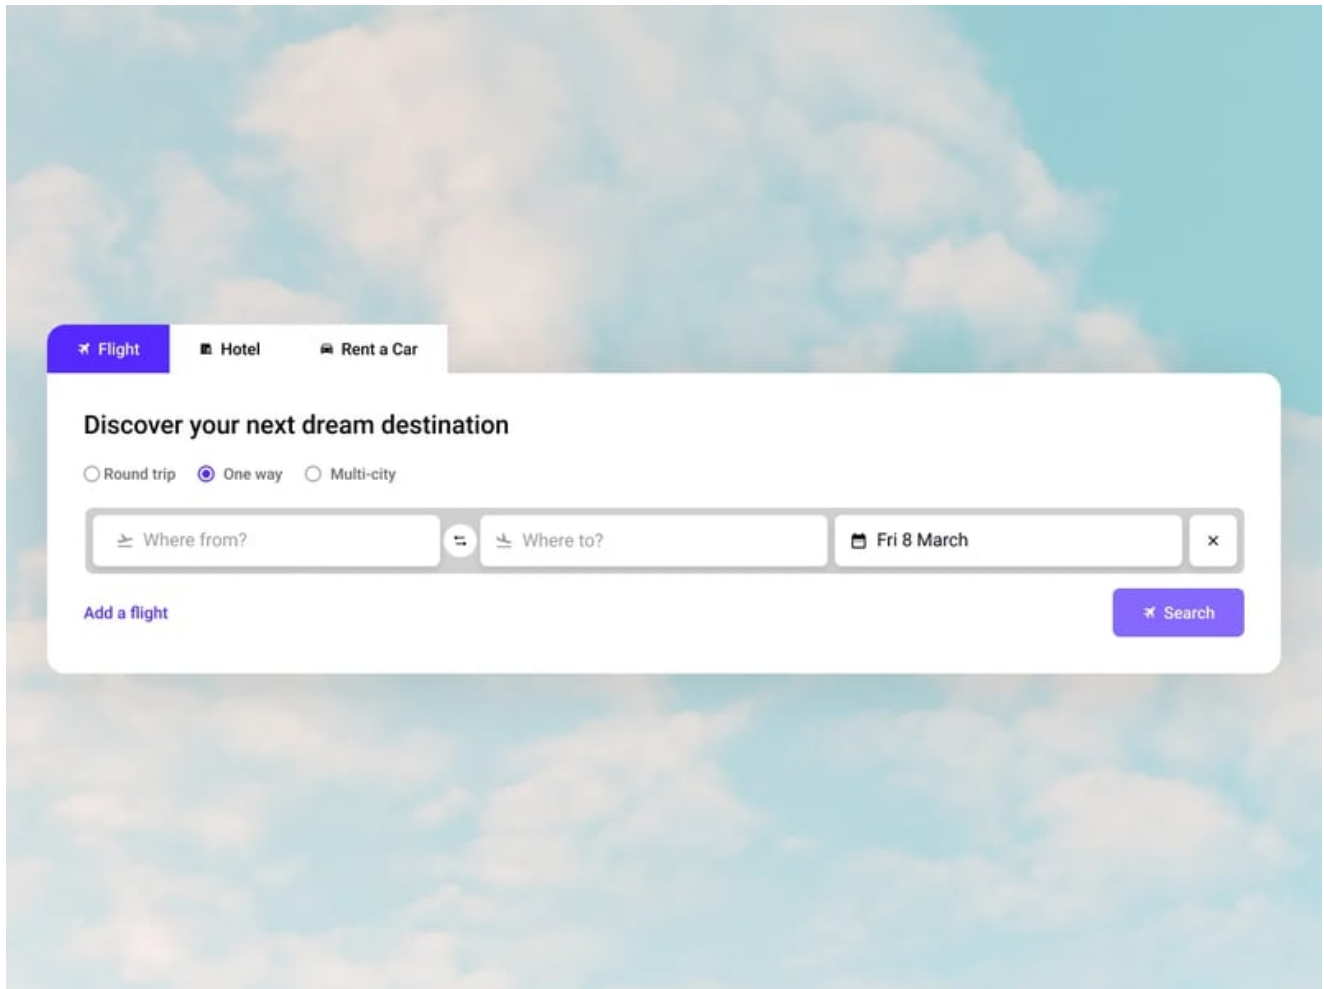

Create a feedback form to rate users' experiences and provide valuable insights via emojis.

36. Sleep App

Design a sleep-tracking app that offers insights into sleep patterns and tips for improvement.

37. Explore Flights

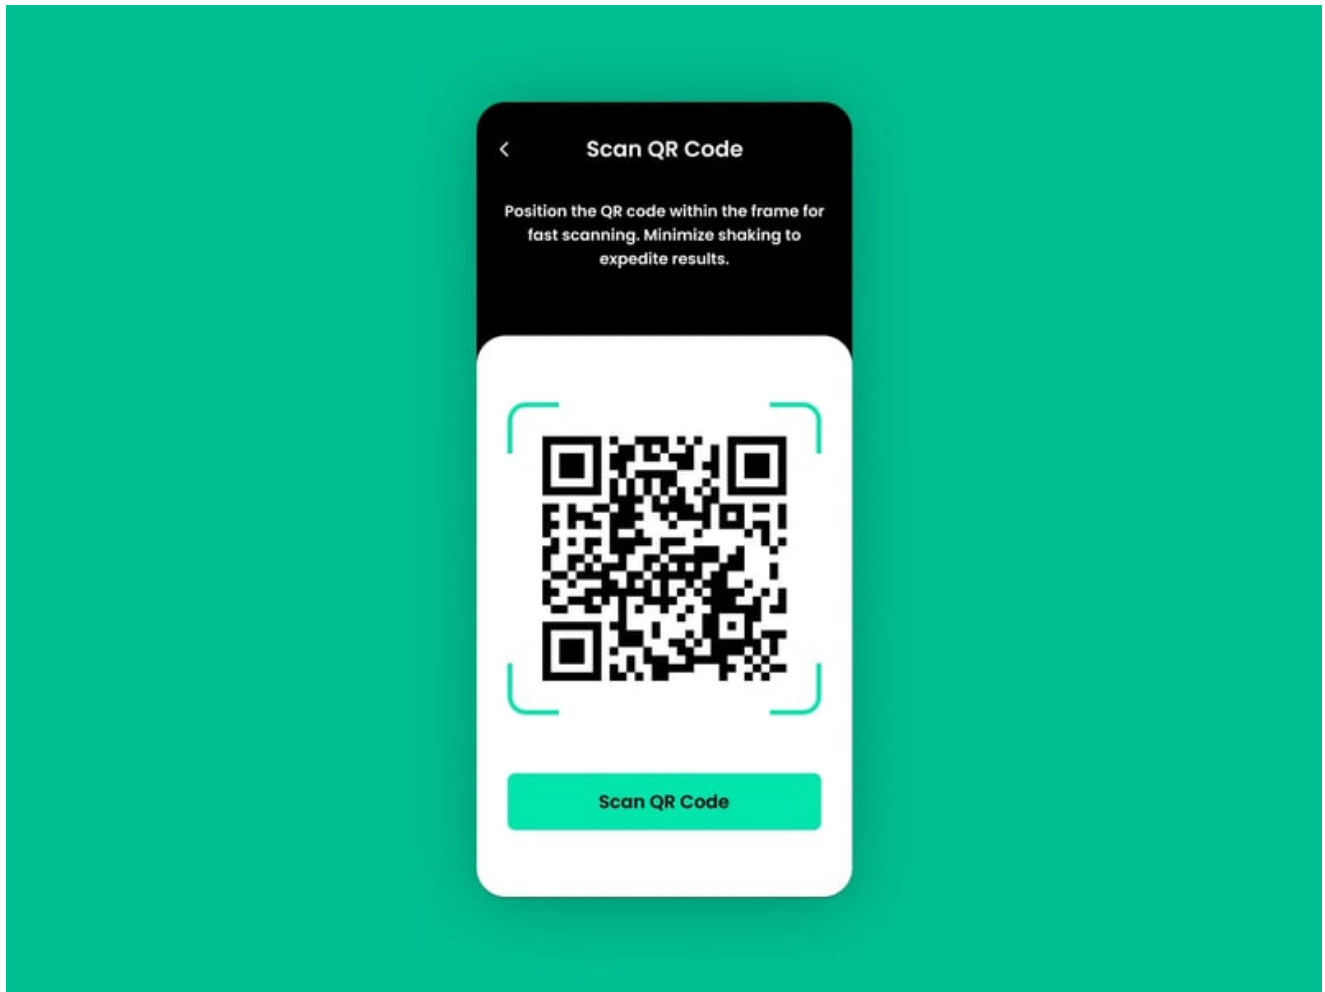

Create a complex flight search filter bar.

38. Music Festival

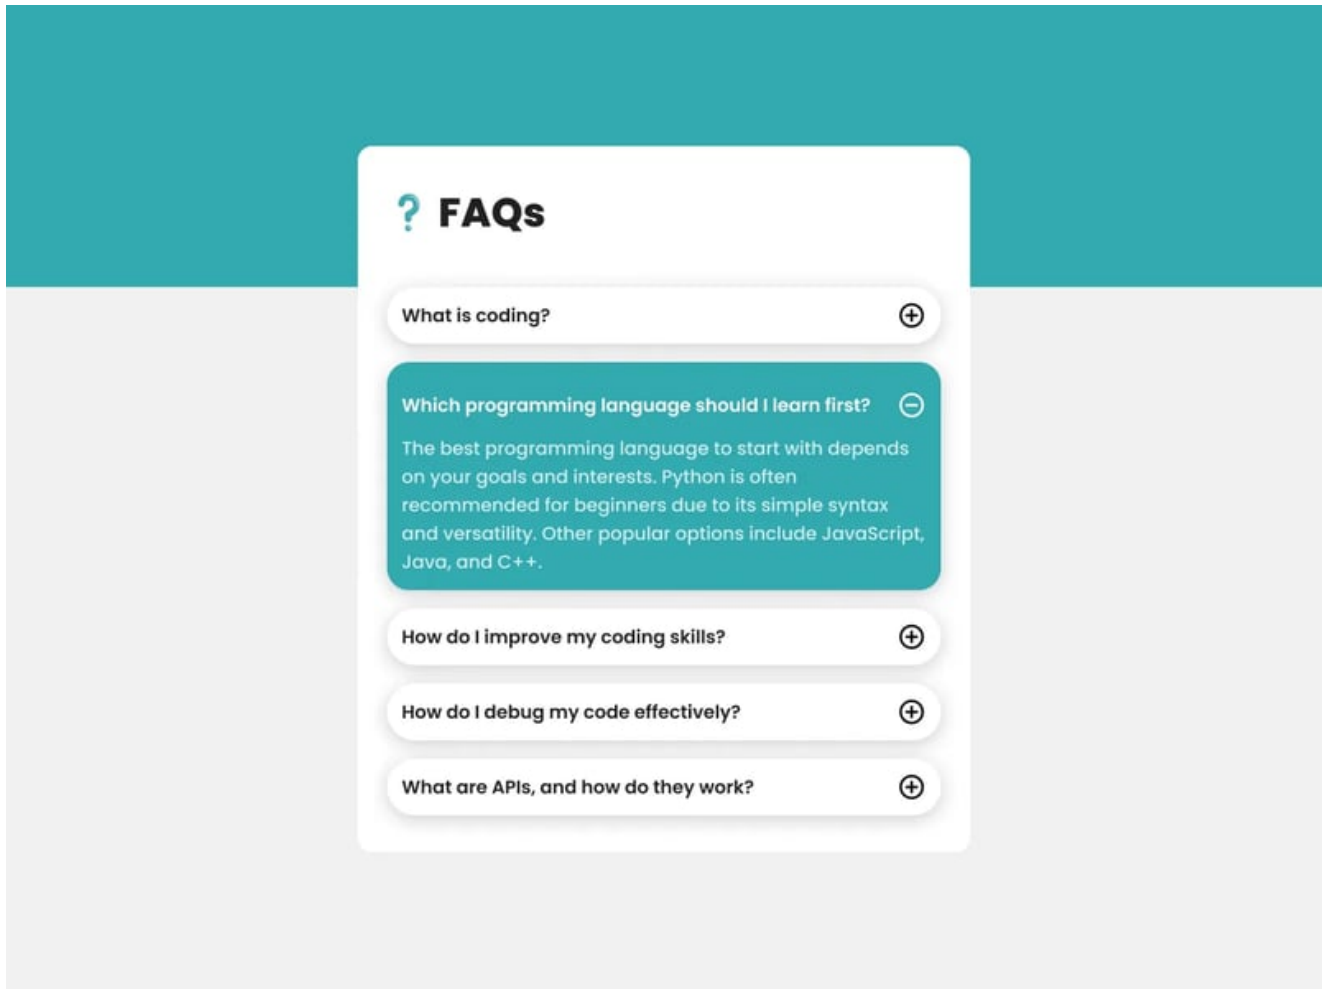

Build a festival home page with navigation and an engaging hero section.

39. QR Code Scanner

Implement a QR code scanner that enhances user interaction with quick scanning features.

40. FAQ

Create a FAQ section that provides clear and helpful answers to common customer questions via the accordion component.

Design a billing page that is user-friendly and makes it easy to view subscriptions, payment methods, and billing history.

54. Article Summary

Create a summary card of the article with images, user info, and relevant stats.

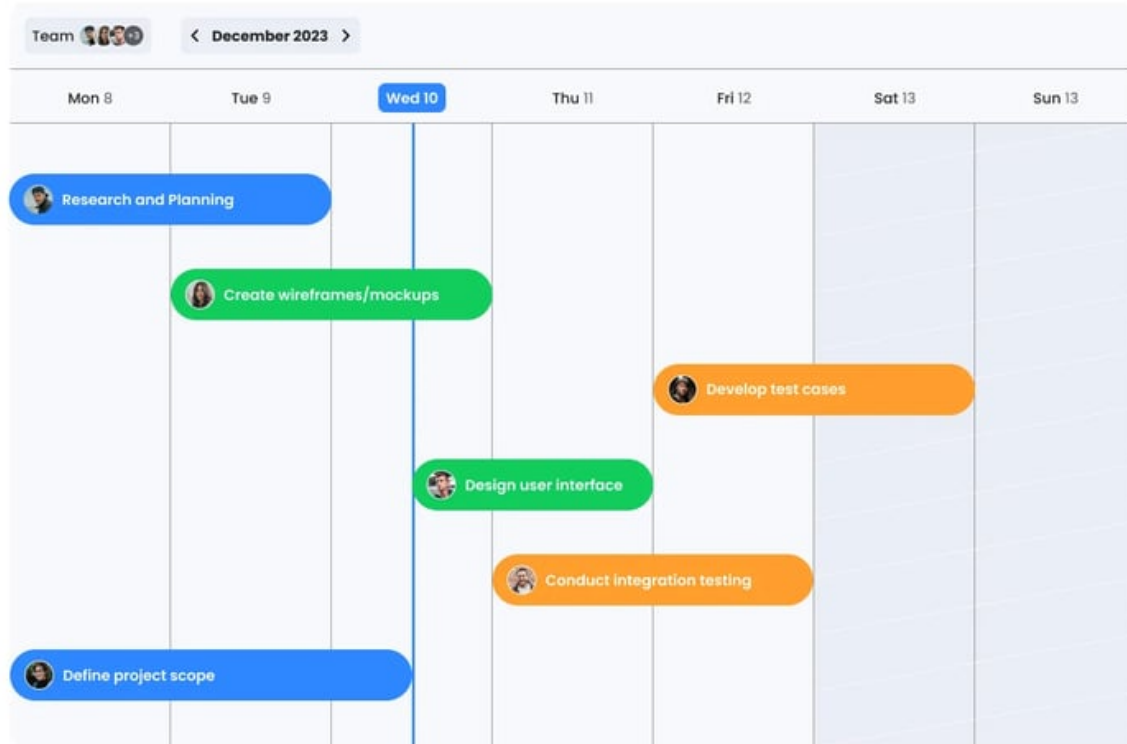

55. Progress Bars

Design engaging and informative progress bars for applications that track user progress.

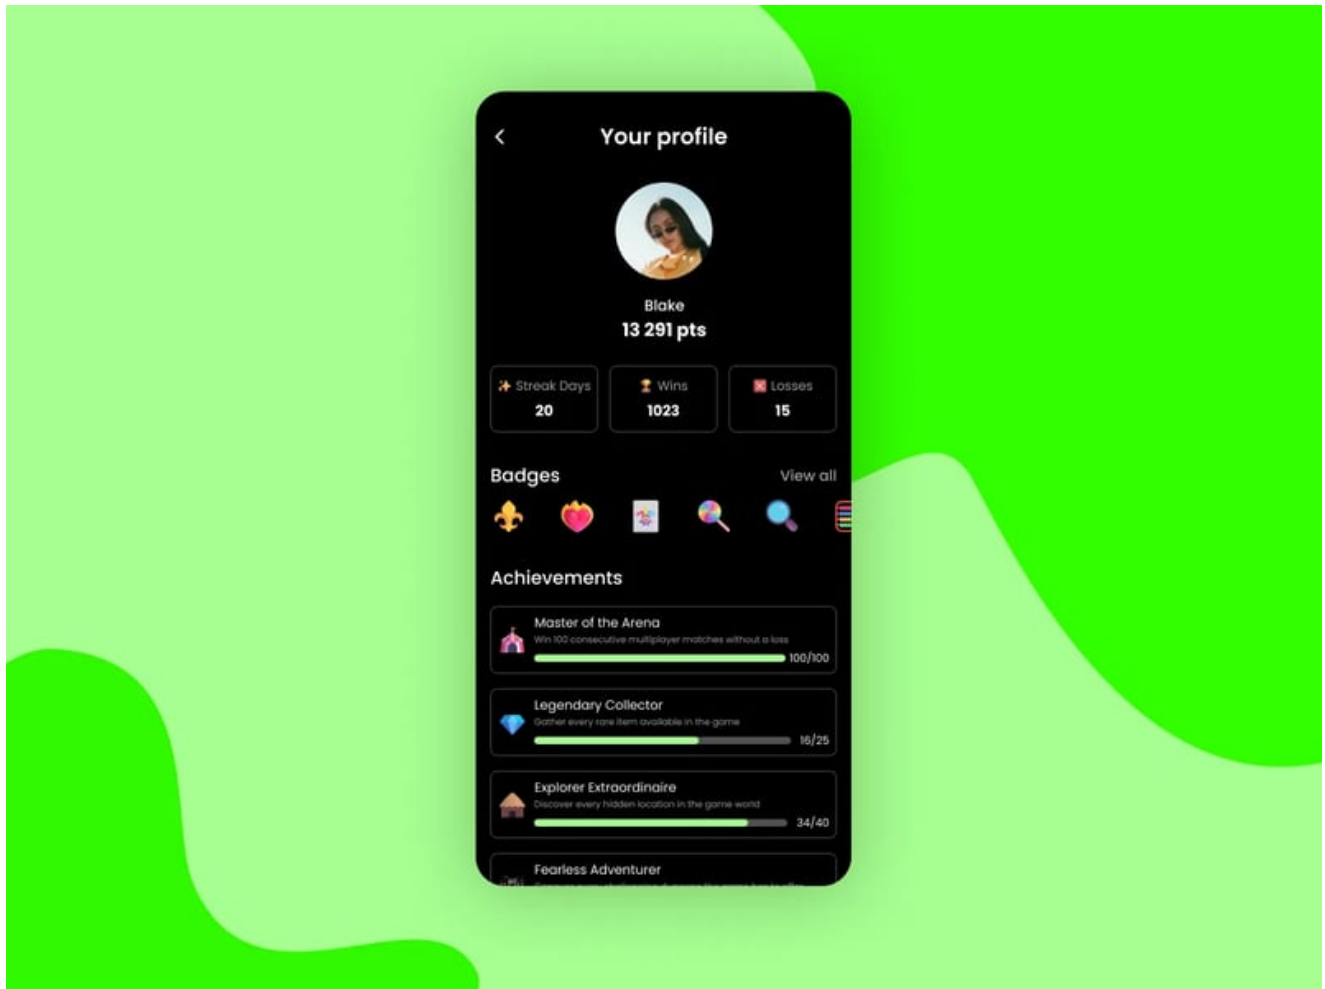

56. Project Roadmap

Project Task

Build a project management tool that visualizes roadmaps and tracks milestones.

57. Game Profile

Design a game profile interface that displays player achievements, game stats, and badges.

58. Create Task

The image shows a 'Create a Task' form with the following fields and options:

- Title:** A text input field with the placeholder text 'Input' and a character count '56'.
- Date:** A date picker showing 'Thursday, 23 Mar 2024' with a calendar icon.
- Color:** Four colored circles (purple, green, yellow, pink) for selection.
- Assigned to:** A list of three users: Julie Wright, Connie Dietz, and Richard Bright, each with a close button (X).
- Priority:** A dropdown menu currently showing 'Medium'. The dropdown is open, showing options: Low (cloud icon), Medium (flame icon), and High (fire icon).
- Buttons:** A 'Cancel' button and a green 'Save Task' button.

Develop a task creation form that simplifies project management and collaboration.

Create a task manager that helps users organize their daily tasks and deadlines.

94. Time Widget

Design a time widget that offers various clock functionalities and customization options.

95. 404

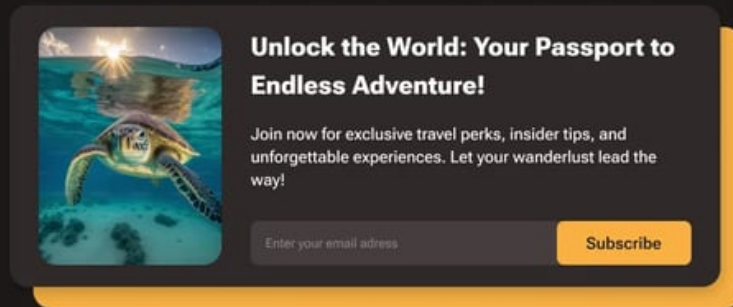

Hmm, looks like you've wandered off the digital path

In the labyrinth of cyberspace, even the most experienced travelers can stumble upon dead ends. Take a moment to reorient yourself or return to the homepage to chart a new course.

[Back to Home](#)[Visit Help Center](#)

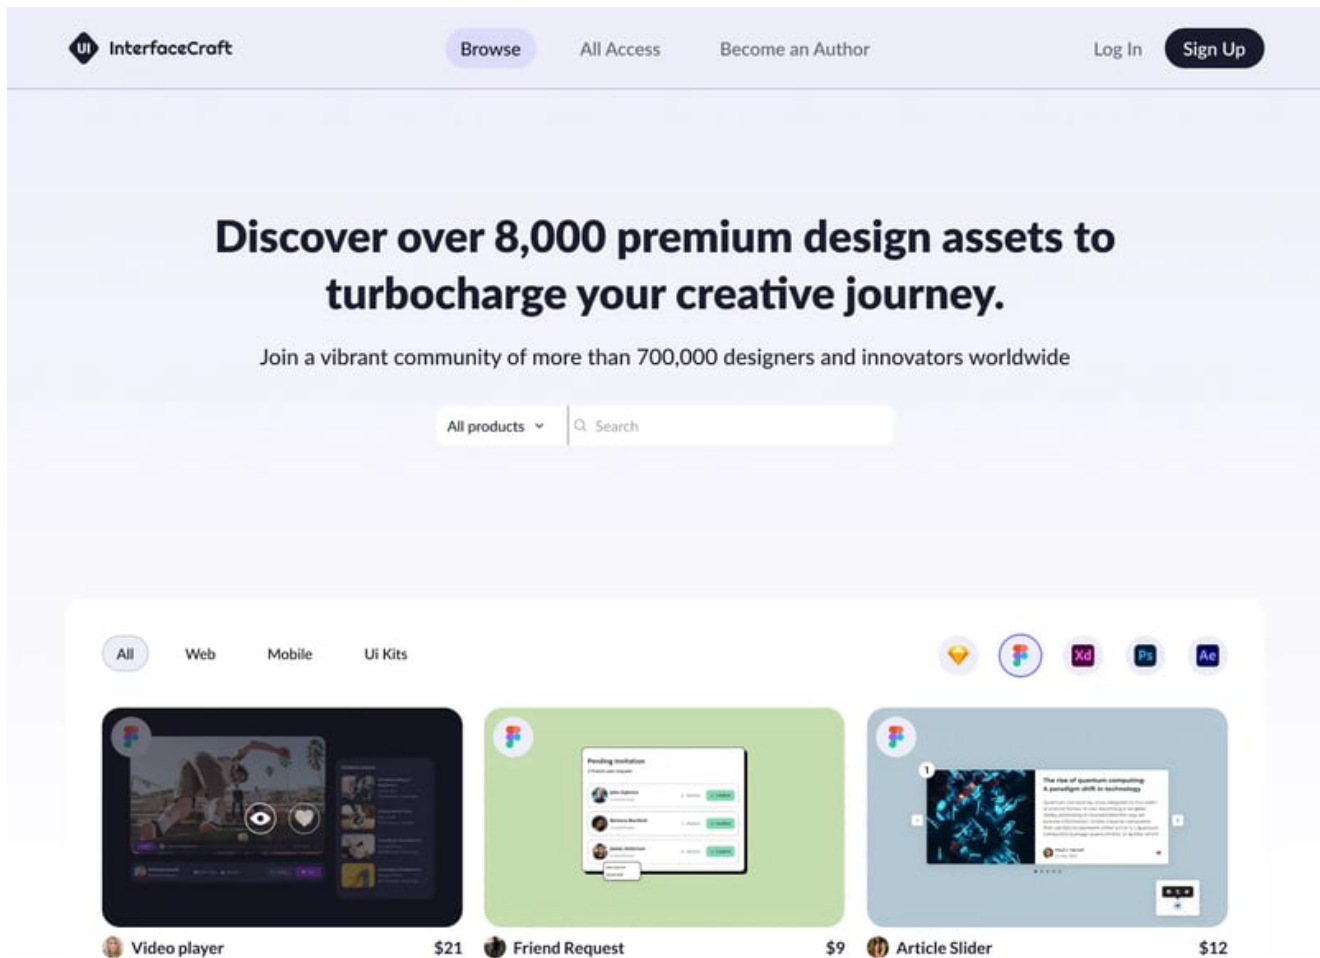

Develop a 404 error page that helps lost users find their way back or to useful resources.

96. Subscribe Card

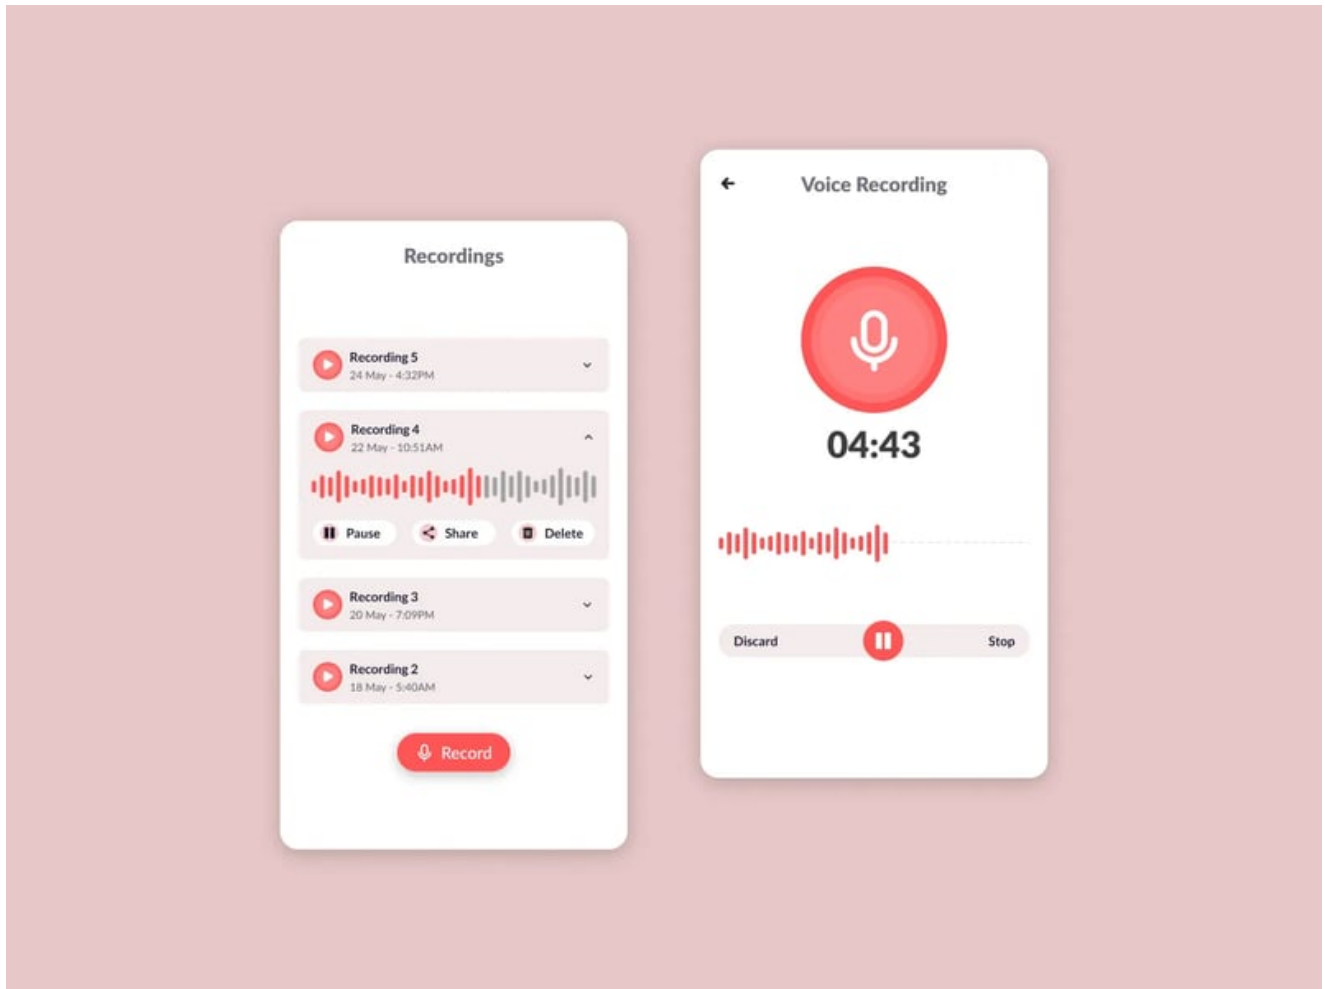

Create a subscription card feature that captures user interest and increases sign-ups.

97. Design Assets

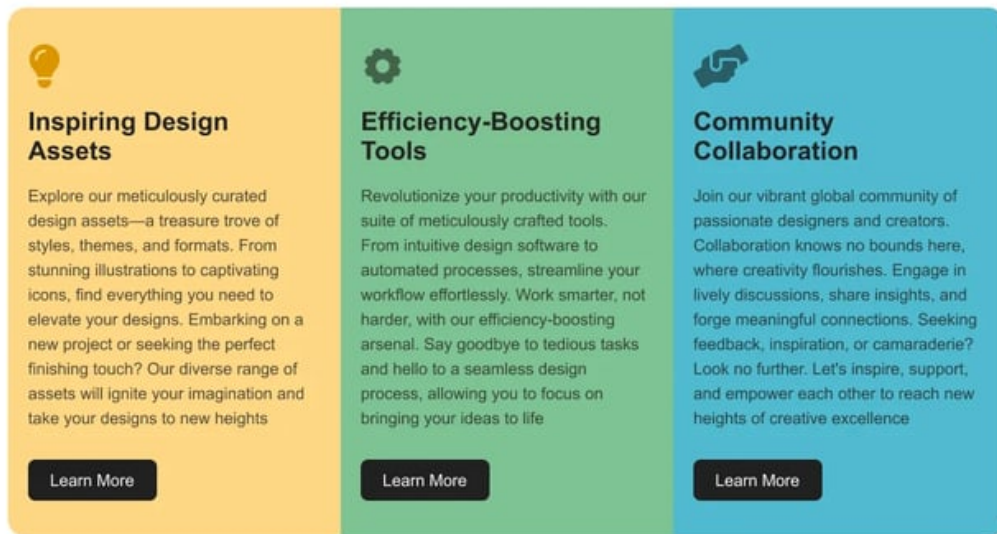

Build a design assets home page where users can access different design files.

98. Voice Recording

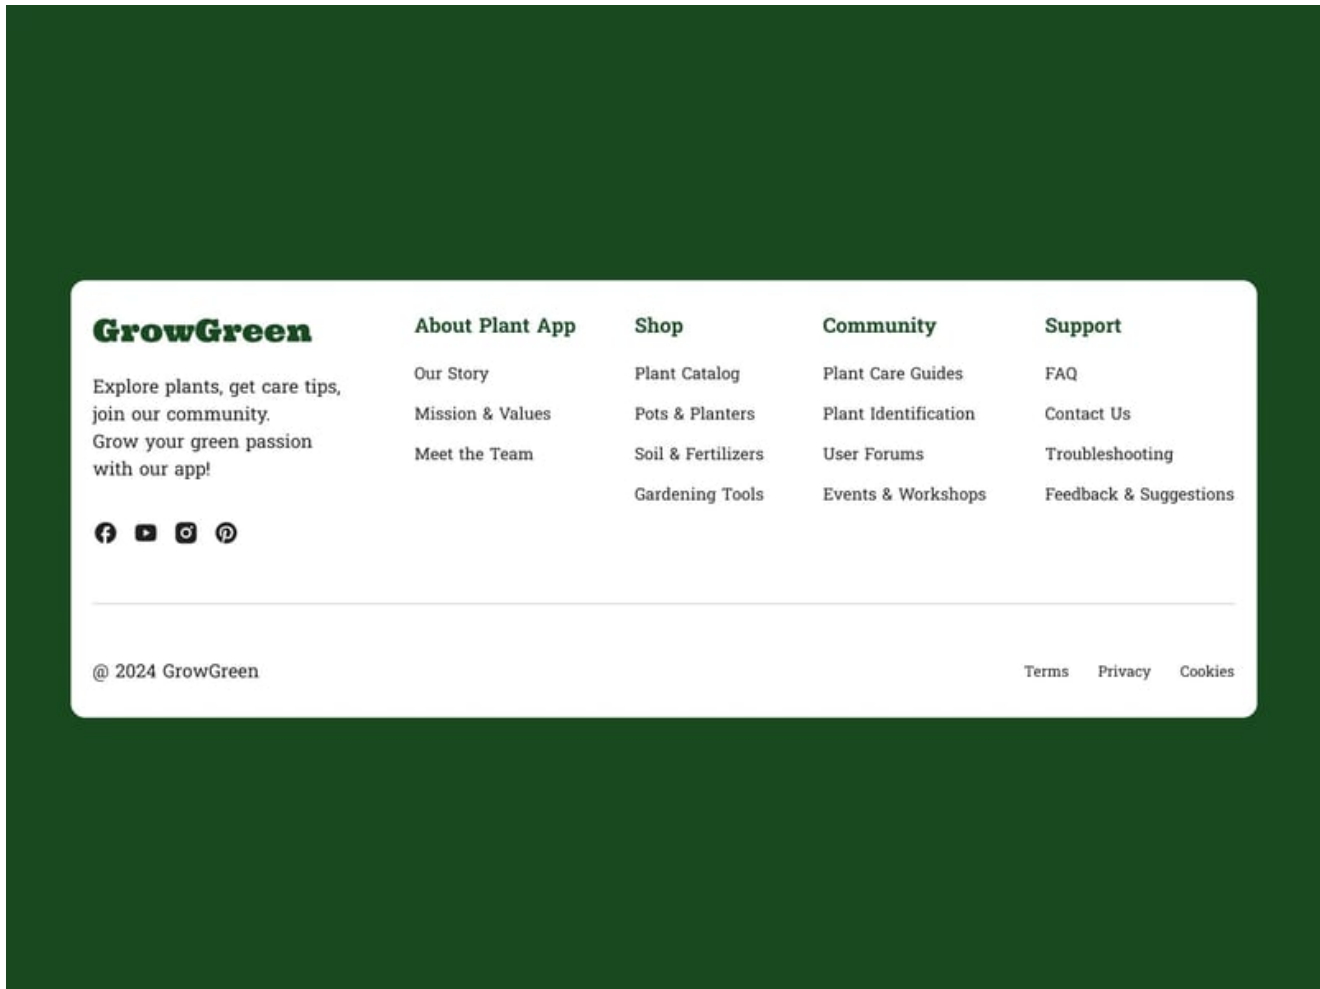

Develop a voice recording app that captures clear audio and offers share, and delete features.

99. Columns Card

Create a card layout that displays information in columns for better data presentation.

100. Footer

Design a website footer that includes all necessary links and information in a clean layout.

Summary

That's a lot of challenges but if you complete all of them, I'm pretty sure you'll get new, awesome dev skills that will 10x speed up your dream job-finding process.

It's been my goal for a long time to spread a project-based learning approach through the community and having BigDevSoon up and running, an app we've been working on for the last 3 years is a great achievement to us.

We have a **CODEWINDOW50** code up and running until June 30, 2024.

Support us if you enjoy the content! ❤️
